FINANCIAL DOMAIN

- Microfinance
- Loan Management
- Finance & Accounting ERP
- Branch Operations
- Fixed Assets
- Procurement
- Invoicing & Payments
- Audit & Compliance

TECHNICAL SKILLS

Backend
Java, Spring Boot, Hibernate/JPA, Microservices, REST APIs, Groovy on Grails, FastAPI

Security
OAuth2, JWT, Okta SSO, Google OAuth, Secret Manager

Cloud & DevOps
GCP (GKE, GCE, Pub/Sub, BigQuery, Cloud SQL), AWS (S3, SQS, SNS, SES), Docker, Jenkins, CI/CD, Tomcat, Nginx

Data
PostgreSQL, MySQL, Oracle 19c, BigQuery, Redis, RabbitMQ

Applied AI
LLM integration (Claude, Vertex AI, Azure OpenAI), speech-to-text, AI-assisted development (Claude, Copilot, ChatGPT)

Frontend
ReactJS, AngularJS, JavaScript

Md. Liton Miah

Senior Technical Project Manager · Engineering Lead

FinTech & Enterprise Platforms · Cloud-Native Delivery · Applied AI

Technical project manager with 13+ years of experience building and delivering secure, high-volume enterprise systems. Built finance, microfinance and loan management platforms serving 3,000+ branches, and now lead teams of up to 30 engineers for clients in Japan and the US, from legacy modernization to GenAI products. I combine hands-on Java and cloud architecture with audit-ready Agile delivery and production GenAI experience, and I'm looking to lead technology delivery at a FinTech or digital bank.

PROFESSIONAL EXPERIENCE

Senior Technical Project Manager — Jul 2025 – Present
Principal Software Engineer (Technical PM) — Mar 2023 – Jun 2025
BJIT Limited · Dhaka

- Lead end-to-end delivery for Japanese and US clients: requirements, estimation, sprint planning, code review and multi-region releases.
- Own solution architecture, with client sign-off on data flows, ERDs, API specifications and infrastructure design. Run delivery governance through daily stand-ups, sprint metrics, RAG reports and audits every two months.

Patent Management System (PAT) — Aug 2026 – Present

Client: Shin-Etsu Chemical, Japan · **Team:** Led 14 engineers (10 offshore, 4 onsite QA/bridge in Japan)

Migrating the patent management system from a legacy PowerBuilder desktop app to a Java + React web platform. Working with connected systems, it covers patent applications, filing deadlines, R&D disclosures and licensing. Delivery is AI-powered: Claude AI generates the API and screen specs and converts the legacy code, then the team fixes and verifies each feature.

Stack: Java, Spring Boot, Hibernate/JPA, ReactJS, Oracle 19c, JasperReports
Tools: Docker, Jenkins, Gerrit, Tomcat, Nginx, Figma, Jira, Confluence, Claude AI, Copilot, ChatGPT, IntelliJ, VS Code, SQL Developer, Postman, JMeter, JProfiler

IR Meeting Assistant & IR Q&A System — Jun 2026 – Jul 2026

Client: CEC (Computer Engineering & Consulting), Japan · **Team:** Led 7 engineers (5 offshore, 2 onsite QA/bridge in Japan)

Delivered two investor-relations GenAI platforms in parallel for CEC, a Tokyo Stock Exchange Prime-listed system integrator. They cover meeting transcription, question classification, Q&A drafting and automated meeting minutes, on a multi-provider LLM layer that switches between Claude, Vertex AI and Azure OpenAI.

Stack: Python, FastAPI, PostgreSQL, Claude, Vertex AI, Azure OpenAI
Tools: Docker, Nginx, GitLab, Jira, Postman, VS Code, Copilot, IntelliJ, JMeter, JProfiler

CyberBridge System (CBS) — Jul 2025 – May 2026

Client: Shin-Etsu Chemical, Japan · **Team:** Led 18 engineers (15 offshore, 3 onsite QA/bridge in Japan)

Migrated the full CyberBridge System from a legacy PowerBuilder desktop app to Spring Boot + React. Working with connected systems, it moves order, batch and shipping data between offices, plants and partners. To fit the client's time and budget, Claude AI generated the API and screen specs and converted the legacy code, and the team re-engineered all business logic and SQL.

Stack: Java, Spring Boot, Hibernate/JPA, ReactJS, Oracle, JasperReports
Tools: Docker, Jenkins, Gerrit, Tomcat, Nginx, Figma, Jira, Confluence, Claude AI, Copilot, ChatGPT, IntelliJ, VS Code, SQL Developer, Postman, JMeter, JProfiler

Professional Experience (continued)

BJIT Limited (continued)

PockeTalk Ventana Console & BackOffice — Mar 2023 – Jun 2025

Client: PockeTalk Corporation, Japan · **Team:** Led 30 engineers (BE, FE, DevOps, UI/UX, QA)

Flagship translation-device platform with about 1M devices, 30M+ translations and 170+ countries. The Console provides device control, translation history and analytics dashboards. The BackOffice manages customers, devices and regions with Okta and Google OAuth2. Live in the US and rolling out to Japan and the EU.

Stack: Java, Spring Boot, Hibernate/JPA, ReactJS, MySQL, GCP (GKE, BigQuery, Pub/Sub, Firestore), AWS (SQS, SNS, SES)

Tools: GitHub, GitLab, Jira, Postman, JMeter, Fluent Bit, Cloud Monitoring, Adobe XD, IntelliJ, VS Code, SQL Developer, JProfiler

Senior Software Engineer (Team Lead) — Sep 2021 – Mar 2023

Newgen Technology Limited · Dhaka

Loan Management System (LOMS)

Client: Babylon Group · **Team:** Led 8 engineers

Loan management platform for a group holding a large portfolio of bank loans. It automates loan record keeping and loan calculations, with reporting for finance teams.

Stack: Java, Spring Boot, Hibernate/JPA, ReactJS, MySQL, JasperReports

Tools: Swagger, Lombok, GitLab, Jira, IntelliJ, VS Code, Postman, JMeter, JProfiler

SalesCare

Client: Babylon Agriscience · **Team:** Led 13 engineers

Sales and supply-chain automation for multiple companies and depots, on web and Android. It covers stock transfers, sales orders, delivery challans, invoicing and payment collection.

Stack: Java, Spring Boot, Hibernate/JPA, ReactJS, MySQL, JasperReports, Android

Tools: Swagger, Lombok, GitLab, Jira, IntelliJ, VS Code, Postman, JMeter, JProfiler

Senior Software Engineer (Team Lead) — Jul 2018 – Sep 2021
Software Engineer — Feb 2015 – Jun 2018

BRAC IT Services Limited · Dhaka

HO Finance (BFAMS)

Client: BRAC · **Team:** Led 8 engineers

Enterprise finance platform automating head office and branch finance. Its APIs run daily operations for 3,000+ branches with real-time financial information.

Stack: Java, Spring Boot, Hibernate/JPA, AngularJS, Thymeleaf, PostgreSQL, JasperReports

Tools: Postman, GitLab, Jira, IntelliJ, VS Code, SQL Developer, JMeter, JProfiler

sbiCloud ERP: Microfinance & Procurement

Client: BRAC International (multi-country, starting in Uganda) · **Role:** Software Engineer

Automates the full microfinance cycle from branch to head office in real time, and runs procurement with electronic approvals, drill-down reporting and internal controls.

Stack: Groovy on Grails, MySQL, PostgreSQL, jqGrid, jQuery, Ajax, JasperReports

Tools: SVN, Mantis, IntelliJ, VS Code, SQL Developer, Postman, JMeter, JProfiler

BRAC ERP: Finance & Fixed Asset

Client: BRAC (multi-enterprise ERP) · **Team:** Led 5 engineers

Finance and Fixed Asset modules integrated with accounts, designed for 3,000 branches and offering APIs for third-party applications.

Stack: Groovy on Grails, AngularJS, PostgreSQL, Metronic, JasperReports

Tools: SVN, GitLab, CI/CD, Jira, IntelliJ, VS Code, SQL Developer, Postman, JMeter, JProfiler

In addition, completed more projects: CMS (complaint management), SMS (school ERP), BDFP (dairy & food ERP), bHSP (health security) · Grails

EARLY CAREER

Software Engineer · CodeCloud Technology Ltd · PHP — Mar 2014 – Jan 2015
Projects: FundMyPet (crowdfunding), YappGuru (app search), Projukti Desk (SEO blog)

Junior Programmer · STM Software Ltd · CMS websites — Jun 2013 – Feb 2014
